

# martin tumwine

## Summary

I am an experienced full stack developer eager to contribute to team success through consistency, open communication with teams and application of best practices of software design and development in my field of work. I have achieved honors in my career such as second runner up in 2017 Uganda Startup cup challenge and led a startup team to roll out a full fledged hospital management system. My career goal is to create products and services through my skills in software development that make every day tasks simpler for the average individual around the world.
